Grade 12 English Curriculum Overview

Grade 12 English is taught in seven units throughout the school year. The English curriculum encourages critical thinking, problem solving, and clear communication. Through small and large group discussions, Socratic seminars, and projects, students will explore themes and character motivation, connecting these to their own lives as well as contemporary society. Writing throughout the year will focus on expository, narrative, and argumentative, and will emphasize editing and revision as life-long skills. Participating in this program helps students:

1. To foster strong, life-long writing skills.
2. To apply universal themes to their own lives.
3. To meet the English standards for New Jersey Public Schools.

<p>Unit Essential Question(s):</p> <ul style="list-style-type: none"> Many people in our society consider the family to be the cornerstone of our society. How do we depend on the family to enable society to function? Is maintaining individual freedom more important than social stability? What issues are involved in creating, lengthening, and improving life? What are the trade-offs for technological advances? What role will I play in future technology? What role does technology play in sustaining human life? What is propaganda and how is it used? What is a dystopia? How does genetic engineering affect my world? Can a perfect world really exist? What is a perfect world? Is it necessary to give up individual rights to achieve a utopia? What is the role of technology in society? How does propaganda influence my decisions? What consequences do we face when we don't take responsibility for our actions? How can scientific advancement and exploration be both good and bad? What is the relationship and responsibility between 	<p>Unit Enduring Understandings:</p> <ul style="list-style-type: none"> Dystopian literature is often a commentary on our society and a speculation about what our society might look like if its members are not alert. As we have developed technologies as a society we have come to rely upon them, changing our lives to the extent that many consider them necessities rather than luxuries (e.g. electricity, television and radio, the Internet, even running water). This dependence if taken to the extreme can strip us of some of the things we enjoy, that make us human. Scientific advancement can help us learn and prolong our lives, but when it clashes with moral issues and compromises our principles and our humanity, it is harmful. Sometimes people are happier if they are ignorant about the truth, but as individuals, we seek the truth. How we negotiate this challenge is likely a question that will concern us throughout our lives. Striking a balance between what is good for individuals and what is good for society is a concern in democratic nations. Many people in our society consider the family to be the cornerstone of our society. We depend on the family in many ways to enable society to function.

Unit Overview

Content Area: Literature, Writing

Unit Title: 7 - Archetypes

Grade Level: 12

Unit Summary:

"All that happens is symbol, and as it represents itself perfectly, it points to all the rest," stated Johann Wolfgang von Goethe in 1818. We live in a world today surrounded by symbols – from literature and film to television, internet, and advertising, symbols and archetypes pervade our experiences. To better understand our culture, students will study the history of archetypes – from ancient creation myths to Carl Jung and Joseph Campbell to current brand archetypes and use this knowledge to organize information, connect knowledge, and make sense of the world around them.
