

Math

Grade 5

Prepared by:

Danielle Kirsch

Superintendent of Schools:

Marie C. Cirasella, Ed.D.

Approved by the Midland Park Board of Education on

August 23, 2022

Math

Grade 5

Course Description:

The 5th grade mathematics curriculum is aligned with the New Jersey Student Learning Standards and follows the concrete, pictorial, abstract model of instruction. Instruction for new concepts will utilize manipulatives, lead to drawings, and finally utilize algorithms to solve problems. Students will develop their ability to make sense of problems and persevere in solving them, reason abstractly, construct arguments and critique others, model mathematically, attend to precision, and use repeated reasoning. An understanding of the course material will be demonstrated by participating in homework, group and individual class work, quizzes, tests, independent problem solving, and Calendar Math discussions.

The Grade 5 standards focus on following areas: place value; multiplication; division; fractions; area, perimeter, and volume; decimals; and geometry. The three essential areas include: (1) developing fluency when completing operations with fractions; (2) extending division of multidigit numbers to 2-digit divisors, understanding decimals and how they are added into the place value system, completing operations with decimals; and (3) developing an understanding of volume.

Course Sequence:

Unit Title	Pacing
Unit 1: Place Value	22 days
Unit 2: Multiplication	18 days
Unit 3: Division	40 days
Unit 4: Fractions	54 days
Unit 5: Perimeter, Area, & Volume	13 days
Unit 6: Decimals	10 days
Unit 7: Calendar Math	Full Year
State Testing, SGO, Re-Teach, Field Trips, Assemblies, etc.	26 days

Pre-requisite:

Grade 4 Math

UNIT # 1**Overview****Content Area: Math****Unit Title: Place Value****Grade Level(s): 5**

Core Ideas: Students will develop an understanding of the place value system through the billions period and connect that one digit represents 10 times as much as its place value to the right and $1/10$ of what it represents in the place value to the left. The instructional time will focus on developing fluency with addition and subtraction of multi-digit numbers as well as evaluating numerical expressions using order of operations.

Standards (Content and Technology)**CPI#:****Statement:****Performance Expectations (NJSLs)**

5.NBT.A.1	Recognize that in a multi-digit number, a digit in one place represents 10 times as much as it represents in the place to its right and $1/10$ of what it represents in the place to its left.
5.OA.A.1	Use parentheses, brackets, or braces in numerical expressions, and evaluate expressions with these symbols
5.OA.A.2	Write simple expressions that record calculations with numbers, and interpret numerical expressions without evaluating them. For example, express the calculation “add 8 and 7, then multiply by 2” as $2 \times (8 + 7)$. Recognize that $3 \times (18932 + 921)$ is three times as large as $18932 + 921$, without having to calculate the indicated sum or product.
5.OA.B.3	Generate two numerical patterns using two given rules. Identify apparent relationships between corresponding terms. Form ordered pairs consisting of corresponding terms from the two patterns, and graph the ordered pairs on a coordinate plane. For example, given the rule “Add 3” and the starting number 0, and given the rule “Add 6” and the starting number 0, generate terms in the resulting sequences, and observe that the terms in one sequence are twice the corresponding terms in the other sequence. Explain informally why this is so.
SMP.1	Make sense of problems and persevere in solving them.
SMP.2	Reason abstractly and quantitatively
SMP.3	Construct viable arguments and critique the reasoning of others
SMP.4	Model with mathematics.
SMP.5	Use appropriate tools strategically.
SMP.6	Attend to precision.
SMP.7	Look for and make use of structure.
SMP.8	Look for and express regularity in repeated reasoning.

Career Readiness (9.2) Life Literacies, and Key Skills (standard 9.1, 9.4)

9.2.5.CAP.1	Evaluate personal likes and dislikes and identify careers that might be suited to personal likes.
9.2.5.CAP.2	Identify how you might like to earn an income.
9.1.5.EG.3	Explain the impact of the economic system on one’s personal financial goals.
9.1.5.EG.4	Describe how an individual’s financial decisions affect society and contribute to the overall economy.
9.1.5.FP.3	Analyze how spending choices and decision-making can result in positive or negative consequences.
9.4.5.CT.4	Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global

Computer Science and Design Thinking (standard 8)

8.1.5.DA.1	Collect, organize, and display data in order to highlight relationships or support a claim.
8.2.5.ED.2	Collaborate with peers to collect information, brainstorm to solve a problem, and evaluate all possible solutions to provide the best results with supporting sketches or models.

Interdisciplinary Connection

NJLSA.SL.5.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others’ ideas and expressing their own clearly.
NJLSA.SL.4	Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.
NJLSA.SL.2.	Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally

NJLSA.W4	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.		
Cross-cultural Statements/Mandates (<i>Amistad, Holocaust, LGBT/Disabilities, SEL, etc...</i>)			
SEL: References to this mandate are made by studying perseverance through Julia Robinson. After spending decades working on Hilbert's tenth problem, she found a solution in 1980 which was considered a groundbreaking achievement.			
Unit Essential Question(s): <ul style="list-style-type: none"> ● How can you describe the relationship between two place-value positions? ● How do you read, write, and represent whole numbers through hundred millions? ● How can you use properties of operations to solve problems? ● How can you use an exponent to show powers of 10? 		Unit Enduring Understandings: <ul style="list-style-type: none"> ● Students recognize the 10 to 1 relationship among place-value positions. ● Students read and write whole numbers through hundred millions. ● Students use properties of operations to solve problems. ● Write and evaluate repeated factors in exponential form. 	
Evidence of Learning			
Formative Assessments: entrance slips, exit slips, dry erase board practice, homework collection, task cards, participation, teacher observation			
Summative/Benchmark Assessment(s): quizzes, end of unit test			
Alternative Assessments: modified versions of formative and summative assessments, project-based assessment, oral assessment			
Resources/Materials: <ul style="list-style-type: none"> ● curriculum binders ● curriculum calendars ● SMART board ● math textbook ● Every Day Counts Calendar Math ● online resources such as IXL, Prodigy, & Reflex ● math manipulatives 		Key Vocabulary: <ul style="list-style-type: none"> ● place value ● period ● value ● standard form ● word form ● expanded form ● expanded notation ● exponential notation ● exponents 	
Suggested Pacing Guide			
Lesson Name/Topic	Student Learning Objective(s)	Suggested Tasks/Activities:	Day(s) to Complete
Introduction to Math	Students will be able to: <ul style="list-style-type: none"> ● Make connections between numbers and the number line. ● Identify and define number line vocabulary 	<ul style="list-style-type: none"> ● Guided notes on number line vocabulary including decimal & percent ● Identify points on a number line 	4 days
Place Value	Students will be able to: <ul style="list-style-type: none"> ● Identify place value periods to a billion. ● Read and write numbers to the billions. ● Write numbers in standard form, expanded notation, and word form. ● Order and compare numbers to the billions. ● Round numbers to the decided place value. 	<ul style="list-style-type: none"> ● Model numbers using base-ten blocks ● Read "One Grain of Rice" ● Guided notes and review vocabulary including place value, value, and period ● Model writing numbers in standard form, expanded form, and expanded notation, ● Digital task cards on place value forms ● Digital task cards on expanded notation 	11 days

		<ul style="list-style-type: none"> ● Expanded notation scavenger hunt ● Place value forms gallery walk ● Digital place value sort ● Model comparing and ordering numbers using place value ● Digital task cards on comparing and ordering numbers ● Model rounding using base-ten blocks ● Guided notes on rounding ● Digital rounding task cards 	
Exponents	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Identify exponents. ● Explain the meaning of an exponent. ● Represent whole numbers using exponents. ● Understand that any number to the zero power is meaningless. ● Write numbers in exponential notation. 	<ul style="list-style-type: none"> ● Guided notes on exponents ● Guided & independent practice representing exponents ● Guided notes on exponential notation ● Exponential notation gallery walk 	7 days

Teacher Notes: Use the term “rolling 9s” when talking about a number such as 19,984 rounded to the hundreds place. Spiral place value questions and value questions making the students distinguish between the two.

Additional Resources: One Grain of Rice by Demi, place value blocks, “One in a Million” chart made by the previous 4th grade

Differentiation/Modification Strategies

Students with Disabilities	English Language Learners
<ul style="list-style-type: none"> ● Consult student IEP ● Allow errors ● Rephrase questions, directions, and explanations ● Allow a calculator when necessary ● Allow extended time to answer questions, and permit drawing, as an explanation ● Accept participation at any level, even one word ● Consult with Case Managers and follow IEP 	<ul style="list-style-type: none"> ● Consult student ELL Plan ● Assign a buddy, same language or English speaking ● Allow errors in speaking ● Rephrase questions, directions, and explanations ● Allow extended time to answer questions ● Accept participation at any level, even one word
Gifted & Talented Students	Students at Risk
<ul style="list-style-type: none"> ● Consult with G and T teacher ● Provide extension activities ● Make peer leaders ● Build on students’ intrinsic motivations ● Consult with parents to accommodate students’ interests in completing tasks at their level of engagement 	<ul style="list-style-type: none"> ● Consult with I &RS as needed ● Provide extended time to complete tasks ● Consult with Guidance Counselors and follow I&RS procedures/action plans ● Consult with classroom teacher(s) for specific behavior interventions ● Provide rewards as necessary ●
504 Students	Other:
<ul style="list-style-type: none"> ● Consult 504 Plan ● Allow errors ● Rephrase questions, directions, and explanations ● Allow a calculator when necessary

UNIT #2**Overview****Content Area: Math****Unit Title: Multiplication****Grade Level(s): 5**

Core Ideas: Students will develop fluency in multiplying multi-digit whole numbers using area model, partial products, and the standard algorithm. Students will develop fluency within multiplication and make reasonable estimates of their results.

Standards (Content and Technology)**CPI#:****Statement:****Performance Expectations (NJSLs)**

5.NBT.B.5 Fluently multiply multi-digit whole numbers using the standard algorithm.

SMP.1 Make sense of problems and persevere in solving them.

SMP.2 Reason abstractly and quantitatively

SMP.3 Construct viable arguments and critique the reasoning of others

SMP.4 Model with mathematics.

SMP.5 Use appropriate tools strategically.

SMP.6 Attend to precision.

SMP.7 Look for and make use of structure.

SMP.8 Look for and express regularity in repeated reasoning.

Career Readiness (9.2) Life Literacies, and Key Skills (standard 9.1, 9.4)

9.2.5.CAP.1 Evaluate personal likes and dislikes and identify careers that might be suited to personal likes.

9.2.5.CAP.2 Identify how you might like to earn an income.

9.1.5.FP.3 Analyze how spending choices and decision-making can result in positive or negative consequences.

9.4.5.CT.2 Identify a problem and list the types of individuals and resources (e.g., school, community agencies, governmental, online) that can aid in solving the problem

9.4.5.CT.4 Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global

Computer Science and Design Thinking (standard 8)

9.4.5.TL.3 Format a document using a word processing application to enhance text, change page formatting, and include appropriate images graphics, or symbols.

8.2.5.ED.2 Collaborate with peers to collect information, brainstorm to solve a problem, and evaluate all possible solutions to provide the best results with supporting sketches or models.

Interdisciplinary Connection

NJSLSA.SL.5.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.

NJSLSA.SL4 Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.

NJSLSA.SL2. Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally

NJSLSA.W4 Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Cross-cultural Statements/Mandates (*Amistad, Holocaust, LGBT/Disabilities, SEL, etc...*)

Amistad: References to this mandate are made by studying John Urschel, an African American who retired from the NFL at age 26 for a chance at a PhD in mathematics at MIT. As John Urschel most famously quoted, "Being capable of thinking quantitatively – it's the single most important thing."

Unit Essential Question(s):

- How you use basic fact and a pattern to multiply by a 2-digit number?
- How do you utilize the standard algorithm to multiply multi-digit numbers?
- How do you utilize partial products to multiply multi-digit numbers?

Unit Enduring Understandings:

- Students identify patterns and utilize basic facts to multiply mentally by 10, 100, and 1000.
- Students multiply using the standard algorithm.
- Students multiply by using partial products.
- Students multiply by breaking down numbers and applying the area model strategy.

- How do you utilize the area model to break down multi-digit numbers in order to multiply them?

Evidence of Learning

Formative Assessments: entrance slips, exit slips, dry erase board practice, homework collection, task cards, participation, teacher observation

Summative/Benchmark Assessment(s): quizzes, end of unit test

Alternative Assessments: modified versions of formative and summative assessments, project-based assessment, oral assessment

Resources/Materials: curriculum binders, curriculum calendars, SMART board, math textbook, Every Day Counts Calendar Math, online resources such as IXL, Prodigy, Reflex, math manipulatives

Resources/Materials:

- curriculum binders
- curriculum calendars
- SMART board
- math textbook
- Every Day Counts Calendar Math
- online resources such as IXL, Prodigy, Reflex
- math manipulatives

Key Vocabulary:

- factor
- product
- multiple
- array
- commutative property of multiplication
- associative property of multiplication
- identity property of multiplication
- zero property of multiplication
- estimate

Suggested Pacing Guide

Lesson Name/Topic	Student Learning Objective(s)	Suggested Tasks/Activities:	Day(s) to Complete
Introduction to Multiplication	Students will be able to: <ul style="list-style-type: none"> • Draw arrays for all numbers up to 30. • Identify characteristics of square numbers. • Identify properties of multiplication and addition. • Describe patterns when numbers are multiplied by multiples of 10. • Utilize estimation to check the reasonableness of their calculations. 	<ul style="list-style-type: none"> • Guided notes on multiplication vocabulary • Model representing multiplication in three different formats • Draw arrays on graph paper up to 30 to determine prime, composite, and unique numbers • Use those same arrays to find the area and perimeter of each array • Guided notes on multiplication properties (flip book) • Digital properties sort • Multiply by 10s, 100s, 1000s scavenger hunt • Multiply by 10s, 100s, 1000's mystery picture • Estimate products gallery walk • Toss Boss game for estimating products 	7 days
Multiplying Multi Digit Numbers	Students will be able to: <ul style="list-style-type: none"> • Utilize the partial product method to multiply multi digit numbers. • Utilize the traditional algorithm to multiply multi digit numbers. • Utilize the area model to multiply multi digit numbers. 	<ul style="list-style-type: none"> • Guided notes on area model, partial products, and traditional method of multiplication • Math Antics Video • Multiplication Gallery Walk 	11 days

	<ul style="list-style-type: none"> Utilize different strategies to solve multiplication word problems. 	<ul style="list-style-type: none"> Two Digit Multiplication Puzzle Review BLS strategy Create running list of multiplication key words and phrases Guided & independent practice using multiplication to solve word problems 	
<p>Teacher Notes: Utilize the BLS strategy every time a word problem is solved so that it becomes automatic. Calendar Math review and quiz incorporated into the end of this unit.</p>			
<p>Additional Resources: graph paper, Math Antics videos</p>			
<p>Differentiation/Modification Strategies</p>			
<p>Students with Disabilities</p>		<p>English Language Learners</p>	
<ul style="list-style-type: none"> Consult student IEP Allow errors Rephrase questions, directions, and explanations Allow extended time to answer questions, and permit drawing, as an explanation Accept participation at any level, even one word Consult with Case Managers and follow IEP 		<ul style="list-style-type: none"> Consult student ELL Plan Assign a buddy, same language, or English speaking Allow errors in speaking Rephrase questions, directions, and explanations Allow extended time to answer questions Accept participation at any level, even one word

UNIT #3**Overview****Content Area: Math****Unit Title: Division****Grade Level(s): 5**

Core Ideas: Students will extend their knowledge of division to find whole-number quotients of whole numbers with up to four-digit dividends and two-digit divisors using the “Tower Up” method and the standard division algorithm. Students will develop fluency within division and make reasonable estimates of their results.

Standards (Content and Technology)**CPI#:****Statement:****Performance Expectations (NJSL)**

5.NBT.B.6	Find whole-number quotients of whole numbers with up to four-digit dividends and two digit divisors, using strategies based on place value, the properties of operations, and/or the relationship between multiplication and division. Illustrate and explain the calculation by using equations, rectangular arrays, and/or area models.
-----------	---

SMP.1	Make sense of problems and persevere in solving them.
-------	---

SMP.2	Reason abstractly and quantitatively
-------	--------------------------------------

SMP.3	Construct viable arguments and critique the reasoning of others
-------	---

SMP.4	Model with mathematics.
-------	-------------------------

SMP.5	Use appropriate tools strategically.

Cross-cultural Statements/Mandates (Amistad, Holocaust, LGBT/Disabilities, SEL, etc...)

Holocaust Mandate: References to this mandate are made by studying Alan Turing. Turing helped the British and its allies win the Second World War by interpreting the Nazi code correctly using patterns and algebra.

Unit Essential Question(s):

- How do divisibility rules help aide in the division process?

Unit Enduring Understandings:

- Students identify three divisibility rules.
- Division is fair sharing and equal groups.

<ul style="list-style-type: none"> • What is the meaning of division? • How are remainders interpreted? • How do patterns help us divide mentally? • How do compatible numbers help to estimate quotients? • What methods can be used to solve multi-digit division problems? • What strategies can be used to solve division word problems? 	<ul style="list-style-type: none"> • Students interpret remainders depending on the type of question being asked. • Students identify patterns and utilize basic facts to multiply mentally by 10, 100, and 1000. • Compatible numbers help to estimate quotients. • Students use the tower up method and the traditional algorithm to solve multi-digit division problems. • Students will utilize interpreting remainder strategies and different division methods to solve word problems.
--	---

Evidence of Learning

Formative Assessments: entrance slips, exit slips, dry erase board practice, homework collection, task cards, participation, teacher observation

Summative/Benchmark Assessment(s): quizzes, end of unit test

Alternative Assessments: modified versions of formative and summative assessments, project-based assessment, oral assessment

Resources/Materials:

- curriculum binders
- curriculum calendars
- SMART board
- math textbook
- Every Day Counts Calendar Math
- online resources such as IXL, Prodigy, & Reflex
- math manipulatives

Key Vocabulary:

- divide
- dividend
- divisor
- quotient
- remainder
- estimate
- divisibility

Suggested Pacing Guide

Lesson Name/Topic	Student Learning Objective(s)	Suggested Tasks/Activities:	Day(s) to Complete
Divisibility Rules	Students will be able to: <ul style="list-style-type: none"> • Utilize divisibility rules to divide numbers efficiently. 	<ul style="list-style-type: none"> • Guided divisibility notes • Guided & independent practice determining if a multi-digit number can be divided by 2, 3, 5, 6, 9, 10 • Model creating numbers that are divisible by one number but not another • Divisibility rules game 	2 days
Introduction to Division	Students will be able to: <ul style="list-style-type: none"> • Label problems fair share and equal groups • Identify and utilize different formats of division 	<ul style="list-style-type: none"> • Guided notes on division vocabulary • Model division as fair sharing, creating equal groups, and repeated subtraction • Guided practice on the three different ways to represent division 	2 days
Interpreting Remainders	Students will be able to: <ul style="list-style-type: none"> • Solve division word problems and interpret remainders. 	<ul style="list-style-type: none"> • Guided notes on interpreting remainders • Division with remainders gallery walk • Interpreting remainders digital task cards • Interpreting remainders gallery walk 	2 days

Division	<p>Students will be able to:</p> <ul style="list-style-type: none"> Estimate to determine whether their division is reasonable. Identify the pattern when dividing by multiples of 10. Utilize the tower up method to solve multi digit division problems Utilize the traditional method to solve multi digit division problems. Utilize problem solving skills to solve division word problems. 	<ul style="list-style-type: none"> Model dividing by 10, 100, 1000 using “dancing zeros” Using dividing by 10, 100, 1000 to teach division estimation using compatible numbers Model tower up method using base-ten blocks Model traditional method Guided notes on tower up method and traditional method of division Math Antics Video Long Division Escape Room Long Division Error Analysis task cards Square Puzzle Quest: Long Division Long Division Scavenger Hunt 	16 days

UNIT #4**Overview****Content Area: Math****Unit Title: Fractions****Grade Level(s): 5**

Core Ideas: Students will expand their understanding of equivalent fractions and mixed numbers. Students will utilize strategies of common numerator, common denominator, benchmark to $\frac{1}{2}$, complements to 1, number sense, and common denominators in order to compare fractions. Students will expand their understanding of adding and subtracting fractions from like denominators to unlike denominators with and without regrouping. Students will develop an understanding of multiplying fractions using the pictures and algorithms. Students will develop an understanding of dividing fractions by drawing pictures to represent the division.

Standards (Content and Technology)**CPI#:****Statement:****Performance Expectations (NJSL)**

5.NF.A.1	Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators. For example, $\frac{2}{3} + \frac{5}{4} = \frac{8}{12} + \frac{15}{12} = \frac{23}{12}$. (In general, $\frac{a}{b} + \frac{c}{d} = \frac{ad + bc}{bd}$.)
5.NF.A.2	Solve word problems involving addition and subtraction of fractions referring to the same whole, including cases of unlike denominators, e.g., by using visual fraction models or equations to represent the problem. Use benchmark fractions and number sense of fractions to estimate mentally and assess the reasonableness of answers. For example, recognize an incorrect result $\frac{2}{5} + \frac{1}{2} = \frac{3}{7}$, by observing that $\frac{3}{7} < \frac{1}{2}$.
5.NF.B.3	Interpret a fraction as division of the numerator by the denominator ($\frac{a}{b} = a \div b$). Solve word problems involving division of whole numbers leading to answers in the form of fractions or mixed numbers, e.g., by using visual fraction models or equations to represent the problem. For example, interpret $\frac{3}{4}$ as the result of dividing 3 by 4, noting that $\frac{3}{4}$ multiplied by 4 equals 3, and that when 3 wholes are shared equally among 4 people each person has a share of size $\frac{3}{4}$. If 9 people want to share a 50-pound sack of rice equally by weight, how many pounds of rice should each person get? Between what two whole numbers does your answer lie?
5.NF.B.4a	Interpret the product $(\frac{a}{b}) \times q$ as a parts of a partition of q into b equal parts; equivalently, as the result of a sequence of operations $a \times q \div b$. For example, use a visual fraction model to show $(\frac{2}{3}) \times 4 = \frac{8}{3}$, and create a story context for this equation. Do the same with $(\frac{2}{3}) \times (\frac{4}{5}) = \frac{8}{15}$. (In general, $(\frac{a}{b}) \times (\frac{c}{d}) = \frac{ac}{bd}$.)
5.NF.B.5a	Comparing the size of a product to the size of one factor on the basis of the size of the other factor, without performing the indicated multiplication.
5.NF.B.5b	Explaining why multiplying a given number by a fraction greater than 1 results in a product greater than the given number (recognizing multiplication by whole numbers greater than 1 as a familiar case); explaining why multiplying a given number by a fraction less than 1 results in a product smaller than the given number; and relating the principle of fraction equivalence $\frac{a}{b} = \frac{n \times a}{n \times b}$ to the effect of multiplying $\frac{a}{b}$ by 1.
5.NF.B.6	Solve real world problems involving multiplication of fractions and mixed numbers, e.g., by using visual fraction models or equations to represent the problem
5.NF.B.7a	Interpret division of a unit fraction by a non-zero whole number, and compute such quotients. For example, create a story context for $(\frac{1}{3}) \div 4$, and use a visual fraction model to show the quotient. Use the relationship between multiplication and division to explain that $(\frac{1}{3}) \div 4 = \frac{1}{12}$ because $(\frac{1}{12}) \times 4 = \frac{1}{3}$.
5.NF.B.7b	Interpret division of a whole number by a unit fraction, and compute such quotients. For example, create a story context for $4 \div (\frac{1}{5})$, and use a visual fraction model to show the quotient. Use the relationship between multiplication and division to explain that $4 \div (\frac{1}{5}) = 20$ because $20 \times (\frac{1}{5}) = 4$.
5.NF.B.7c	Solve real world problems involving division of unit fractions by non-zero whole numbers and division of whole numbers by unit fractions, e.g., by using visual fraction models and equations to represent the

	problem. For example, how much chocolate will each person get if 3 people share $\frac{1}{2}$ lb of chocolate equally? How many $\frac{1}{3}$ -cup servings are in 2 cups of raisins?
5.MD.B.2	Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$). Use operations on fractions for this grade to solve problems involving information presented in line plots. For example, given different measurements of liquid in identical beakers, find the amount of liquid each beaker would contain if the total amount in all the beakers were redistributed equally.
SMP.1	Make sense of problems and persevere in solving them.
SMP.2	Reason abstractly and quantitatively
SMP.3	Construct viable arguments and critique the reasoning of others
SMP.4	Model with mathematics.
SMP.5	Use appropriate tools strategically.
SMP.6	Attend to precision.
SMP.7	Look for and make use of structure.
SMP.8	Look for and express regularity in repeated reasoning.
Career Readiness (9.2) Life Literacies, and Key Skills (standard 9.1, 9.4)	
9.2.5.CAP.1	Evaluate personal likes and dislikes and identify careers that might be suited to personal likes.
9.2.5.CAP.2	Identify how you might like to earn an income.
9.4.5.CT.1	Identify and gather relevant data that will aid in the problem-solving process
9.4.5.CT.2	Identify a problem and list the types of individuals and resources (e.g., school, community agencies, governmental, online) that can aid in solving the problem
9.4.5.CT.3	Describe how digital tools and technology may be used to solve problems.
9.4.5.CT.4	Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global
Computer Science and Design Thinking (standard 8)	
9.4.5.TL.3	Format a document using a word processing application to enhance text, change page formatting, and include appropriate images graphics, or symbols.
8.1.5.DA.1	Collect, organize, and display data in order to highlight relationships or support a claim.
8.2.5.ED.2	Collaborate with peers to collect information, brainstorm to solve a problem, and evaluate all possible solutions to provide the best results with supporting sketches or models.
Interdisciplinary Connection	
NJSLSA.SL.5.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.
NJSLSA.SL4	Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.
NJSLSA.SL2	Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally
NJSLSA.W4	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
Cross-cultural Statements/Mandates (Amistad, Holocaust, LGBT/Disabilities, SEL, etc...)	
LGBTQ+ Mandate: References to this mandate are made by studying Autumn Kent a pansexual trans woman professor of mathematics at the university of Wisconsin, who in 2019 organized the LGTBQ+ conference to foster collaboration between LGBTQ+ mathematicians working in geometry, topology, and dynamical systems.	
Unit Essential Question(s): <ul style="list-style-type: none"> How do we break down numbers using prime factorization? What are fractions? How do we locate fractions on a number line? What are equivalent fractions How do we simplify fractions so that they are represented in the lowest terms? How can we compare fractions? How can we add fractions with common denominators and without common denominators? How can we subtract fractions with common denominators and without common denominators? 	Unit Enduring Understandings: <ul style="list-style-type: none"> Students utilize prime factorization to break down numbers. Students will define fractions Students will locate fractions on a number line. Students will define equivalent fractions. Students will simplify fractions. Students will compare fractions Students will add fractions with common denominators and without common denominators. Students will subtract fractions with common denominators and without common denominators. Students will multiply fractions.

<ul style="list-style-type: none"> • How can we multiply fractions? • How can we use a diagram to divide unit fractions? • How can we analyze the products of fractions? 	<ul style="list-style-type: none"> • Students will utilize a diagram to divide unit fractions. • Students will identify the rules associated with analyzing products of fractions.
---	--

Evidence of Learning

Formative Assessments: entrance slips, exit slips, dry erase board practice, homework collection, task cards, participation, teacher observation

Summative/Benchmark Assessment(s): quizzes, end of unit test

Alternative Assessments: modified versions of formative and summative assessments, project-based assessment, oral assessment

Resources/Materials:

- curriculum binders
- curriculum calendars
- SMART board
- math textbook
- Every Day Counts Calendar Math
- online resources such as IXL
- Prodigy
- Reflex
- math manipulatives

Key Vocabulary:

- fraction
- numerator
- denominator
- proper fraction
- unit fraction
- improper fraction
- mixed number
- simplify / lowest terms

Suggested Pacing Guide

Lesson Name/Topic	Student Learning Objective(s)	Suggested Tasks/Activities:	Day(s) to Complete
Prime Factorization, GCF, LCM	Students will be able to: <ul style="list-style-type: none"> • Utilize prime factorization to break down numbers. • Utilize the cake method to determine the greatest common factor (GCF) of two numbers. • Utilize the cake method to determine the least common multiple (LCM) of two numbers. 	<ul style="list-style-type: none"> • Model finding the prime factorization of a number • Model the cake method (subsequent division) to find the greatest common factor and the least common multiple of two numbers • Guided & independent practice finding prime factorization, GCF, & LCM 	8 days
Introduction to Fractions	Students will be able to: <ul style="list-style-type: none"> • Describe the meaning of fractions. • Locate fractions on a number line. • Identify equivalent fractions as fractions that are located on the same point on a number line. • Simplify fractions to lowest terms. • Change improper fractions to mixed numbers and mixed numbers to improper fractions. 	<ul style="list-style-type: none"> • Guided Notes on fraction vocabulary • Fraction Flocabulary video • Guided & independent practice locating a fraction on a number line using Mary's Packet Part I & Part II • Model equivalent fractions using fraction strips, highlighting equivalent fractions • Use the algorithm to find equivalent fractions by simplifying to lower terms and building to higher terms • Equivalent fractions mystery picture • Simplifying Fractions Escape Room 	18 days

		<ul style="list-style-type: none"> ● Guided notes on converting improper fractions and mixed numbers ● Mixed and Improper Fractions Puzzle 	
Comparing Fractions	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Compare fractions with like denominators. ● Compare fractions with like numerators. ● Compare fractions by benchmarking to $\frac{1}{2}$. ● Compare fractions by finding complements to 1. 	<ul style="list-style-type: none"> ● Guided Notes on different ways to compare fractions ● Create benchmark list for halves, thirds, fourths, fifths, sixths, eighths, tenths, and twelfths ● Guided & independent practice using the comparing fractions packet 	7 days
Addition and Subtraction of Fractions	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Add fractions with like denominators. ● Add mixed numbers with like denominators. ● Subtract fractions with like denominators. ● Subtract mixed numbers with like denominators with regrouping. ● Add fractions with unlike denominators when one denominator is a multiple of the other. ● Subtracting unlike denominators with the denominator is a multiple of the other with and without regrouping. ● Find a common denominator when adding and subtracting fractions when one denominator is not a multiple of the other. ● Utilize problem solving strategies to solve addition and subtraction of fractions word problems. 	<ul style="list-style-type: none"> ● Model adding and subtracting fractions (mixed numbers) with like denominators using pattern blocks and fraction tiles ● Guided & independent practice using fraction packet to add and subtract fractions with common denominators ● Model finding a common denominator to add and subtract fractions ● Guided & independent practice using fraction packet to add and subtract fractions with unlike denominators ● Adding and Subtracting fractions gallery walk ● Sugar Cookie Puzzle ● Model using BLS to solve addition and subtraction of fractions word problems ● Guided & independent practice using fraction packet to solve word problems 	9 days
Multiplying Fractions	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Multiply fractions and whole numbers. ● Multiply fractions and fractions using a diagram and standard algorithm. 	<ul style="list-style-type: none"> ● Model multiplying fractions by whole numbers using “groups of” and fraction tiles and models ● Model multiplying fractions by fractions, fractions by whole numbers, and fractions by mixed number using the “brownie pan” method ● Guided & independent practice using models to 	4 days

		<p>multiply fractions using the Fraction Action packet</p> <ul style="list-style-type: none"> ● Connect models to multiplying fractions using the standard algorithm 	
Dividing Fractions	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Divide whole numbers by unit fractions using a diagram ● Solve word problems utilize multiplication and division of fractions strategies. 	<ul style="list-style-type: none"> ● Model dividing whole numbers by unit fractions using fraction tiles ● Model dividing a unit fraction by a whole number using the “brownie pan” method ● Guided & independent practice ● Review BLS strategy to solve multiplication and division of fraction word problems ● Multiplying & Dividing Fractions Gallery Walk 	6 days
Analyzing products with Fractions	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Analyze the products of fractions ● Demonstrate an understanding of the product and how it relates to the problem presented. 	<ul style="list-style-type: none"> ● Guided notes on analyzing products with fractions ● Have students analyze products while solving fraction multiplication 	2 days

Teacher Notes:

When teacher prime factorization we utilize the “cake method” which builds going up like a tiered cake.
 When subtracting mixed numbers with like and unlike denominators with regrouping, the term used is “going to the bank”.

Additional Resources: fraction shapes, fraction shape reference card, fraction strips, fraction tiles, number lines

Differentiation/Modification Strategies

Students with Disabilities	English Language Learners
<ul style="list-style-type: none"> ● Consult student IEP ● Allow errors ● Rephrase questions, directions, and explanations ● Allow a calculator when necessary ● Allow extended time to answer questions, and permit drawing, as an explanation ● Accept participation at any level, even one word ● Consult with Case Managers and follow IEP 	<ul style="list-style-type: none"> ● Consult student ELL Plan ● Assign a buddy, same language or English speaking ● Allow errors in speaking ● Rephrase questions, directions, and explanations ● Allow extended time to answer questions ● Accept participation at any level, even one word
Gifted & Talented Students	Students at Risk
<ul style="list-style-type: none"> ● Consult with G and T teacher ● Provide extension activities ● Make peer leaders ● Build on students’ intrinsic motivations ● Consult with parents to accommodate students’ interests in completing tasks at their level of engagement 	<ul style="list-style-type: none"> ● Consult with I &RS as needed ● Provide extended time to complete tasks ● Consult with Guidance Counselors and follow I&RS procedures/action plans ● Consult with classroom teacher(s) for specific behavior interventions ● Provide rewards as necessary ●

UNIT #5**Overview****Content Area: Math****Unit Title: Perimeter, Area & Volume****Grade Level(s): 5****Core Ideas:** Students will expand their understanding of area and perimeter by creating linear models, decomposing figures and finding the area of fractional sides.**Standards (Content and Technology)****CPI#:****Statement:****Performance Expectations (NJSLs)**

5.NF.B.4b	Find the area of a rectangle with fractional side lengths by tiling it with unit squares of the appropriate unit fraction side lengths, and show that the area is the same as would be found by multiplying the side lengths. Multiply fractional side lengths to find areas of rectangles, and represent fraction products as rectangular areas.
5.MD.C.3a	A cube with side length 1 unit, called a “unit cube,” is said to have “one cubic unit” of volume, and can be used to measure volume.
5.MD.C.3b	A solid figure which can be packed without gaps or overlaps using n unit cubes is said to have a volume of n cubic units
5.MD.C.4	Measure volumes by counting unit cubes, using cubic cm, cubic in, cubic ft, and non-standard units
5.MD.C.5a	Find the volume of a right rectangular prism with whole-number side lengths by packing it with unit cubes, and show that the volume is the same as would be found by multiplying the edge lengths, equivalently by multiplying the height by the area of the base. Represent threefold whole-number products as volumes, e.g., to represent the associative property of multiplication.
5.MD.C.5b	Apply the formulas $V = l \times w \times h$ and $V = B \times h$ for rectangular prisms to find volumes of right rectangular prisms with whole number edge lengths in the context of solving real world and mathematical problems.
5.MD.C.5c	Recognize volume as additive. Find volumes of solid figures composed of two non overlapping right rectangular prisms by adding the volumes of the non-overlapping parts, applying this technique to solve real world problems.
SMP.1	Make sense of problems and persevere in solving them.
SMP.2	Reason abstractly and quantitatively
SMP.3	Construct viable arguments and critique the reasoning of others
SMP.4	Model with mathematics.
SMP.5	Use appropriate tools strategically.
SMP.6	Attend to precision.
SMP.7	Look for and make use of structure.
SMP.8	Look for and express regularity in repeated reasoning.
Career Readiness (9.2) Life Literacies, and Key Skills (standard 9.1, 9.4)	
9.2.5.CAP.1	Evaluate personal likes and dislikes and identify careers that might be suited to personal likes.
9.4.5.CT.1	Identify and gather relevant data that will aid in the problem-solving process.
9.4.5.CT.2	Identify a problem and list the types of individuals and resources (e.g., school, community agencies, governmental, online) that can aid in solving the problem.
9.4.5.CT.3	Describe how digital tools and technology may be used to solve problems.
9.4.5.CT.4	Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global.
Computer Science and Design Thinking (standard 8)	
9.4.5.TL.3	Format a document using a word processing application to enhance text, change page formatting, and include appropriate images graphics, or symbols.
8.1.5.DA.1	Collect, organize, and display data in order to highlight relationships or support a claim.
8.2.5.ED.2	Collaborate with peers to collect information, brainstorm to solve a problem, and evaluate all possible solutions to provide the best results with supporting sketches or models.

Interdisciplinary Connection

NJSLSA.SL.5.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.
NJSLSA.SL4	Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.
NJSLSA.SL2.	Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally
NJSLSA.W4	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

Cross-cultural Statements/Mandates (*Amistad, Holocaust, LGBT/Disabilities, SEL, etc...*)

Disabilities Mandate: References to this mandate are made by studying John Forbes diagnosed with schizophrenia who made important mathematical contributes to differential geometry.

Unit Essential Question(s):

- What is perimeter?
- How can we determine the perimeter of a rectangle?
- What is area?
- How can we determine the area of a rectangle?
- How can we take complex figures apart to find the area?
- Determine the area of a figure that is a fraction of the original area.
- What is volume?
- How can we determine the volume of a rectangular prism?

Unit Enduring Understandings:

- Students will define perimeter.
- Students will determine the perimeter of a rectangle.
- Students will define area.
- Students will determine the area of a rectangle.
- Students will decompose complex figures to find the area.
- Students will determine the area of a figure that is a fraction of the figure's original area.
- Students will define volume.
- Students will determine the volume of a rectangular prism.

Evidence of Learning

Formative Assessments: entrance slips, exit slips, dry erase board practice, homework collection, task cards, participation, teacher observation

Summative/Benchmark Assessment(s): quizzes, end of unit test

Alternative Assessments: modified versions of formative and summative assessments, project-based assessment, oral assessment

Resources/Materials:

- curriculum binders
- curriculum calendars
- SMART board
- math textbook
- Every Day Counts Calendar Math
- online resources such as IXL
- Prodigy
- Reflex
- math manipulatives

Key Vocabulary:

- area
- perimeter
- volume
- length
- width
- height
- base

Suggested Pacing Guide

Lesson Name/Topic	Student Learning Objective(s)	Suggested Tasks/Activities:	Day(s) to Complete
Perimeter	Students will be able to: <ul style="list-style-type: none"> ● Define perimeter ● Utilize the standard algorithm to find the perimeter of a rectangle. 	<ul style="list-style-type: none"> ● Guided notes on perimeter ● Model perimeter is linear using toothpicks ● Guided & independent practice finding perimeter of regular and irregular shapes as well as finding the missing dimension when given the perimeter 	2 days
Area	Students will be able to: <ul style="list-style-type: none"> ● Define area 	<ul style="list-style-type: none"> ● Guided notes on Area 	4 days

	<ul style="list-style-type: none"> Utilize the standard algorithm to find the area of a rectangle Decompose composite figures to find the total area of the figure Determine the area of fractional sides 	<ul style="list-style-type: none"> Model area is additive through composite figures Guided & independent practice finding area of rectangles/square using the $A=l \times w$ formula as well as finding the missing side length when given the area Model finding area of fractional sides using graph paper and square tiles 	
Volume	<p>Students will be able to:</p> <ul style="list-style-type: none"> Define volume Utilize the algorithm length x width x height to find the volume Utilize the algorithm B x height to find the volume 	<ul style="list-style-type: none"> Guided notes on Volume Model volume through unifix cubes to find volume and volume of complex figures Guided & independent practice finding volume of rectangular prisms and complex figures using both formulas Popcorn Prisms experiment Volume around the room activity 	7 days

Teacher Notes: When introducing perimeter, refer to using the toothpicks in 4th grade and the top bottom, top bottom procedure to laying them out.

Utilize unifix cubes to create complex figures that can be decomposed into rectangular prisms to find volume.

Stress the formulas for volume are: $V=l \times w \times h$ OR $V=B \times h$ (big B times height)

Additional Resources: unifix cubes, tooth picks, red inch square and green quarter inch squares are to be used for area of fractional sides.

Differentiation/Modification Strategies

UNIT #6**Overview****Content Area: Math****Unit Title: Decimals****Grade Level(s): 5**

Core Ideas: Students will expand their understanding of the place value system through the thousandths period and connect that one digit represents 10 times as much as its place value to the right and one tenth of what it represents in the place value to the left. Students will develop their understanding of decimals by adding and subtracting decimals to the thousandths place. Students will order and compare decimals on a number line and round decimals to the correct place value. Students will multiply decimals using pictures and the standard algorithm and divide decimals utilizing a model.

Standards (Content and Technology)**CPI#:****Statement:****Performance Expectations (NJSLs)**

5.NBT.A.2 Explain patterns in the number of zeros of the product when multiplying a number by powers of 10 and explain patterns in the placement of the decimal point when a decimal is multiplied or divided by a power of 10. Use whole-number exponents to denote powers of 10.

5.NBT.A.3a Read, write, and compare decimals to thousandths. Read and write decimals to thousandths using base-ten numerals, number names, and expanded form, e.g., $347.392 = 3 \times 100 + 4 \times 10 + 7 \times 1 + 3 \times (1/10) + 9 \times (1/100) + 2 \times (1/1000)$

5.NBT.A.3b Read, write, and compare decimals to thousandths. Compare two decimals to thousandths based on meanings of the digits in each place, using $>$, $=$, and $<$ symbols to record the results of comparisons.

5.NBT.A.4 Use place value understanding to round decimals to any place.

5.NBT.B.7 Add, subtract, multiply, and divide decimals to hundredths, using concrete models or drawings and strategies based on place value, properties of operations, and/or the relationship between addition and subtraction; relate the strategy to a written method and explain the reasoning used.

SMP.1 Make sense of problems and persevere in solving them.

SMP.2 Reason abstractly and quantitatively

SMP.3 Construct viable arguments and critique the reasoning of others

SMP.4 Model with mathematics.

SMP.5 Use appropriate tools strategically.

SMP.6 Attend to precision.

SMP.7 Look for and make use of structure.

SMP.8 Look for and express regularity in repeated reasoning.

Career Readiness (9.2) Life Literacies, and Key Skills (standard 9.1, 9.4)

9.2.5.CAP.1 Evaluate personal likes and dislikes and identify careers that might be suited to personal likes.

9.2.5.CAP.2 Identify how you might like to earn an income.

9.1.5.EG.4 Describe how an individual's financial decisions affect society and contribute to the overall economy.

9.1.5.FP.3 Analyze how spending choices and decision-making can result in positive or negative consequences.

9.4.5.CT.1 Identify and gather relevant data that will aid in the problem-solving process.

9.4.5.CT.2 Identify a problem and list the types of individuals and resources (e.g., school, community agencies, governmental, online) that can aid in solving the problem.

9.4.5.CT.4 Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global.

Computer Science and Design Thinking (standard 8)

9.4.5.TL.3 Format a document using a word processing application to enhance text, change page formatting, and include appropriate images graphics, or symbols.

8.1.5.DA.1 Collect, organize, and display data in order to highlight relationships or support a claim.

8.2.5.ED.2 Collaborate with peers to collect information, brainstorm to solve a problem, and evaluate all possible solutions to provide the best results with supporting sketches or models.

Interdisciplinary Connection

NJLSA.SL.5.1 Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.

NJLSA.SL4 Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.

NJSLSA.SL2.	Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally		
NJSLSA.W4	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.		
Cross-cultural Statements/Mandates (<i>Amistad, Holocaust, LGBT/Disabilities, SEL, etc...</i>)			
Disabilities Mandate: References to this mandate are made by studying Solomon Lefschetz, an amputee and mathematician who did fundamental work on algebraic topology and its applications to algebraic geometry as well as the theory of non-linear ordinary differential equations.			
Unit Essential Question(s):		Unit Enduring Understandings:	
<ul style="list-style-type: none"> • What are decimals? • How do decimals relate to fractions? • How do we write decimals in different forms? • How do we add and subtract decimals? • How do we multiply decimals and what does that look like as a diagram? • How do we divide decimals using a diagram? • How does place value play a role in decimals? 		<ul style="list-style-type: none"> • Students will define decimals. • Students will relate decimals to fractions. • Students will write decimals in different forms. • Students will add and subtract decimals correctly. • Students will multiply decimals using an algorithm and a diagram. • Students will divide decimals using a diagram. • Students will describe how place value plays a role in decimals. 	
Evidence of Learning			
Formative Assessments: entrance slips, exit slips, dry erase board practice, homework collection, task cards, participation, teacher observation			
Summative/Benchmark Assessment(s): quizzes, end of unit test			
Alternative Assessments: modified versions of formative and summative assessments, project-based assessment, oral assessment.			
Resources/Materials:		Key Vocabulary:	
<ul style="list-style-type: none"> • curriculum binders • curriculum calendars • SMART board • math textbook • Every Day Counts Calendar Math • online resources such as IXL • Prodigy • Reflex • math manipulatives 		<ul style="list-style-type: none"> • decimal • tenths • hundredths • thousandths • standard form • word form • expanded form • expanded notation • equivalent decimals • estimate 	
Suggested Pacing Guide			
Lesson Name/Topic	Student Learning Objective(s)	Suggested Tasks/Activities:	Day(s) to Complete
Introduction to Decimals	Students will be able to: <ul style="list-style-type: none"> • Identify pictures of decimals. • Locate decimals on a number line • Write decimals in word form, standard form, and expanded notation. • Compare and order decimals. • Round decimals to different place values. 	<ul style="list-style-type: none"> • Guided notes on decimals • Model decimals using base ten blocks • Guided & independent practice identifying decimals from models and modeling decimals in a tenths or hundredths chart • Guided notes on decimal forms • Decimal Place Value BINGO • Digital Task Cards on decimal place value • Model decimals on a number line 	3 days

		<ul style="list-style-type: none"> ● Model comparing and ordering decimals using place value ● Model rounding decimals to any place value ● Brain Pop video on rounding decimals ● Guided & independent practice comparing, ordering, and rounding decimals 	
Addition and Subtraction of Decimals	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Add decimals with and without regrouping. ● Subtract decimals with and without regrouping. 	<ul style="list-style-type: none"> ● Model adding and subtracting decimals using place value and graph paper ● Math Antics Video ● Guided & independent practice adding and subtracting decimals 	2 days
Multiplication of Decimals	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Multiply decimals by drawing a diagram. ● Multiply decimals by multiplying and placing the decimal point in the correct place. 	<ul style="list-style-type: none"> ● Model multiplying decimals using a diagram (groups of) ● Model multiplying decimals using the standard algorithm ● Guided & independent practice multiplying decimals using models and the standard algorithm 	2 days
Division of Decimals	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Divide decimals using a diagram. ● Distinguish between a division problem that is fair share and a problem that is equal groups. ● Identify the correct diagram to match an existing division problem. 	<ul style="list-style-type: none"> ● Model dividing decimals using a diagram ● Model difference between fair sharing and equal groups ● Guided & independent practice dividing decimals using a diagram 	2 days
Decimal Word Problems	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Solve word problems by multiplying and dividing decimals. 	<ul style="list-style-type: none"> ● Model BLS strategy for solving word problems involving multiplication and division of decimals ● Guided & independent practice 	2 days

Teacher Notes: When dividing decimals, students only need to be able to complete the correct picture. Stress the difference between fair share and equal groups. Stress that when a decimal is divided by a decimal the answer is a whole number (equal groups) and when a decimal is divided by a whole number the answer is a decimal (fair share).

Additional Resources: packet with tenths grids and hundredths grids, place value blocks, colored pencils

UNIT #7**Overview****Content Area: Math****Unit Title: Calendar Math****Grade Level(s): 5**

Core Ideas: Students will utilize a variety of math skills and extend their thinking throughout the year. Students will identify patterns and predict future patterns. Students will utilize skills such as addition and subtraction with regrouping, identifying equivalent fractions, percents, and decimals, and converting measurements throughout the year. Students will also demonstrate knowledge of 2D and 3D shapes and their relationships.

Standards (Content and Technology)**CPI#:****Statement:****Performance Expectations (NJSL)**

5.NBT.A.1	Recognize that in a multidigit number, a digit in one place represents 10 times as much as it represents in the place to its right and 1/10 of what it represents in the place to its left.
5.NF.A.1	Add and subtract fractions with unlike denominators (including mixed numbers) by replacing given fractions with equivalent fractions in such a way as to produce an equivalent sum or difference of fractions with like denominators. For example, $\frac{2}{3} + \frac{5}{4} = \frac{8}{12} + \frac{15}{12} = \frac{23}{12}$. (in general, $\frac{a}{d} + \frac{c}{d} = \frac{ad+bc}{bd}$.)
5.MD.A.1	Convert among different-sized standard measurement units within a given measurement system (e.g., convert 5cm to 0.05 m), and use these conversions in solving multi-step, real world problems.
5.G.A.1	Use a pair of perpendicular number lines, called axes, to define a coordinate system, with the intersection of the lines (the origin) arranged to coincide with the 0 on each line and a given point in the plane located by using an ordered pair of numbers, called its coordinates. Understand that the first number indicates how far to travel from the origin in the direction of one axis, and the second number indicates how far to travel in the direction of the second axis, with the convention that the names of the two axes and the coordinates correspond (e.g., x-axis and x-coordinate, y-axis and y-coordinate).
5.G.A.2	Represent real world and mathematical problems by graphing points in the first quadrant of the coordinate plane, and interpret coordinate values of points in the context of the situation.
5.G.B.3	Understand that attributes belonging to a category of two-dimensional figures also belong to all subcategories of that category. For example, all rectangles have four right angles and square are rectangles, so all squares have four right angles.
5.G.B.4	Classify two-dimensional figures in a hierarchy based on properties.
SMP.1	Make sense of problems and persevere in solving them.
SMP.2	Reason abstractly and quantitatively
SMP.3	Construct viable arguments and critique the reasoning of others
SMP.4	Model with mathematics.
SMP.5	Use appropriate tools strategically.
SMP.6	Attend to precision.
SMP.7	Look for and make use of structure.
SMP.8	Look for and express regularity in repeated reasoning.
Career Readiness (9.2) Life Literacies, and Key Skills (standard 9.1, 9.4)	
9.2.5.CAP.1	Evaluate personal likes and dislikes and identify careers that might be suited to personal likes.
9.2.5.CAP.2	Identify how you might like to earn an income.
9.1.5.CR.1	Compare various ways to give back and relate them to your strengths, interests, and other personal factors.
9.1.5.EG.4	Describe how an individual's financial decisions affect society and contribute to the overall economy.
9.1.5.FP.3	Analyze how spending choices and decision-making can result in positive or negative consequences.
9.4.5.CT.2	Identify a problem and list the types of individuals and resources (e.g., school, community agencies, governmental, online) that can aid in solving the problem.
9.4.5.CT.3	Describe how digital tools and technology may be used to solve problems.
9.4.5.CT.4	Apply critical thinking and problem-solving strategies to different types of problems such as personal, academic, community and global.
Computer Science and Design Thinking (standard 8)	
8.1.5.DA.1	Collect, organize, and display data in order to highlight relationships or support a claim.

8.1.5.DA.3	Organize and present collected data visually to communicate insights gained from different views of the data.
8.2.5.ED.2	Collaborate with peers to collect information, brainstorm to solve a problem, and evaluate all possible solutions to provide the best results with supporting sketches or models.
8.2.5.ED.6	Evaluate and test alternative solutions to a problem using the constraints and tradeoffs identified in the design process.
Interdisciplinary Connection	
NJSLSA.SL.5.1	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 5 topics and texts, building on others' ideas and expressing their own clearly.
NJSLSA.SL4	Present information, findings, and supporting evidence such that listeners can follow the line of reasoning and the organization, development, and style are appropriate to task, purpose, and audience.
NJSLSA.SL2.	Integrate and evaluate information presented in diverse media and formats, including visually, quantitatively, and orally
NJSLSA.W4	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
Cross-cultural Statements/Mandates (<i>Amistad, Holocaust, LGBT/Disabilities, SEL, etc...</i>)	
Amistad Mandate: References to this mandate are made by studying Benjamin Banneker, an African American who built America's first clock.	
Unit Essential Question(s): <ul style="list-style-type: none"> • What are patterns and how can we describe them? • What is geometry and how does it exist in my life? • How can I use algebraic thinking to solve problems? • How do math concepts relate to one another? • How can I use math in my everyday life? 	Unit Enduring Understandings: <ul style="list-style-type: none"> • Students will define and describe patterns. • Students will define geometry and relate it to their life. • Students will utilize algebraic thinking to solve problems. • Students will describe how math concepts relate to one another. • Students will describe how math is used in everyday life.
Evidence of Learning	
Formative Assessments: entrance slips, exit slips, dry erase board practice, homework collection, task cards, participation, teacher observation Summative/Benchmark Assessment(s): quizzes, end of month tests Alternative Assessments: modified versions of formative and summative assessments, project-based assessment, oral assessment	
Resources/Materials: <ul style="list-style-type: none"> • curriculum binders • curriculum calendars • SMART board • math textbook • Every Day Counts Calendar Math • online resources such as IXL • Prodigy • Reflex • math manipulatives 	Key Vocabulary: <ul style="list-style-type: none"> • September- fraction, decimal, percent, pattern, simplify, attributes, line, perpendicular lines, ray, line segment, parallel lines, points, multiples, estimate • October- fraction, decimal, percent, pattern, simplify, attributes, regular polygon, nonregular polygon, multiples, arrays, unique, prime, composite, square numbers, customary units of measure • November- fraction, decimal, percent, pattern, simplify, prime, composite, square, unique, customary units of time • December- fraction, decimal, percent, pattern, simplify, metric units of length, multiples • January- fraction, decimal, percent, pattern, simplify, acute angle, obtuse angle, right angle, straight angle, elapsed time • February- fraction, decimal, percent, pattern, simplify, equilateral triangle, isosceles triangle, scalene triangle, acute/obtuse/right triangle

- March- fraction, decimal, percent, pattern, simplify, three-dimensional shapes, customary units of liquid capacity
- April- fraction, decimal, percent, pattern, simplify, metric units of weight

Suggested Pacing Guide

Lesson Name/Topic	Student Learning Objective(s)	Suggested Tasks/Activities:	Day(s) to Complete
September	Students will be able to: <ul style="list-style-type: none"> ● Convert fraction to decimal to percent equivalencies. ● Identify patterns. ● Reduce/Simplify fraction to lowest terms. ● Compare and analyze attributes of lines. ● Identify multiples of 2, 3, and 6. ● Identify even and odd numbers. ● Subtract multi-digit numbers with and without regrouping. ● Estimate the concept of 1,000,000 with 1,000 as a referent 	<ul style="list-style-type: none"> ● Guided notes on vocabulary ● Snakes and Ladders Games with lines, line segments, ray, point, parallel lines, intersecting lines ● Patterns Packet ● Identify multiples of 2,3,6 in a pattern 	1 month (approximately 20 minutes a day)
October	Students will be able to: <ul style="list-style-type: none"> ● Convert fraction to decimal to percent equivalencies. ● Identify patterns. ● Reduce/Simplify fraction to lowest terms. ● Compare and analyze attributes of polygons. ● Identify multiples of 8. ● Subtract multi-digit numbers with and without regrouping. ● Build arrays. ● Identify prime, composite, square numbers, square roots, and #1 as a unique number. ● Add $\frac{1}{16}$ of a whole per day. ● Convert between ounces and pounds. ● Convert between feet, yards, and inches. 	<ul style="list-style-type: none"> ● Guided notes on polygons ● Polygon Picture ● Digital task cards on polygons ● Play Game Polygon or not a Polygon ● Create arrays on graph paper to identify prime, composite, and square numbers ● Play Buzz ● Identify multiples of 8 through a pattern ● Add a foot a day ● Add $\frac{1}{16}$ of a whole per day 	1 month (approximately 20 minutes a day)
November	Students will be able to: <ul style="list-style-type: none"> ● Convert fraction to decimal to percent equivalencies. ● Identify patterns. ● Reduce/Simplify fraction to lowest terms. ● Identify prime, composite, and square numbers. ● Discuss the clock and movement of the hour hand and minute hand. ● Utilize clock terminology. ● Identify basic conversions: Seconds in minute, minutes in hour, hours in day 	<ul style="list-style-type: none"> ● Guided Notes on quadrilateral hierarchy ● Math Antics Video on quadrilaterals ● Create arrays on graph paper to identify prime, composite, and square numbers ● Play Buzz ● Brain Pop video on clock 	1 month (approximately 20 minutes a day)

Midland Park Public Schools

December	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Convert fraction to decimal to percent equivalencies. ● Reduce/Simplify fraction to lowest terms. ● Convert between centimeters, meters, and kilometers. ● Identify equivalencies between standard units of measure and metric units of measure. ● Utilize a ruler to measure to the nearest inch and centimeter. ● Tell time on the clock to the $\frac{1}{4}$ hour. ● Identify the multiples of 7. 	<ul style="list-style-type: none"> ● Model using a ruler to measure. ● Guided & independent practice in ruler packet ● Add 10 cm per day ● Identify multiples of 7 on a pattern 	1 month (approximately 20 minutes a day)
January	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Convert fraction to decimal to percent equivalencies. ● Identify patterns. ● Reduce/Simplify fraction to lowest terms. ● Identify, classify, and measure angles. ● Utilize a protractor correctly. ● Convert between ounces, cups, pints, quarts, and gallons. ● Tell time to the minute. ● Determine elapsed time to the minute. 	<ul style="list-style-type: none"> ● Guided notes on angles ● Guided & independent practice using angle packet (model protractor) ● Guided notes on liquid capacity ● Don't Spill the Milk Game ● Add a cup a day 	1 month (approximately 20 minutes a day)
February	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Convert fraction to decimal to percent equivalencies. ● Identify patterns. ● Reduce/Simplify fraction to lowest terms. ● Classify triangles in two ways. ● Utilize the sum of angles to determine if the sum of three angles can be classified as a triangle. 	<ul style="list-style-type: none"> ● Guided notes on triangles ● Guided & independent practice using triangle packet ● Triangle Google Slides 	1 month (approximately 20 minutes a day)
March	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Convert fraction to decimal to percent equivalencies. ● Identify patterns. ● Reduce/Simplify fraction to lowest terms. ● Identify and classify three dimensional shapes ● Utilize metric liquid capacity to measure liquid. 	<ul style="list-style-type: none"> ● Guided notes on three-dimensional figures ● Create geometric shapes using nets ● 3D shapes google slides ● Add 10 milliliters per day 	1 month (approximately 20 minutes a day)
April	<p>Students will be able to:</p> <ul style="list-style-type: none"> ● Convert fraction to decimal to percent equivalencies. ● Identify patterns. ● Reduce/Simplify fraction to lowest terms. 	<ul style="list-style-type: none"> ● Model how to identify a growing pattern ● Add 100 grams a day 	1 month (approximately 20 minutes a day)

	<ul style="list-style-type: none"> • Use algebraic thinking to solve a growing pattern. • Utilize grams and kilograms to measure and convert between the two. • Recognize triangular numbers

Teacher Notes:

September	Use March pieces Page 100 in book	January	Use April pieces Page 114 in book
October	Use November pieces Page 46 in book	February	Use October pieces Page 34 in book
November	Use December pieces Page 60 in book	March	Use February pieces Page 84 in book
December	Use January pieces Page 72 in book	April	Use May/June pieces Page 126 in book

Additional Resources:

Grade 5 Every Day Counts Calendar Math by Gillespie and Kanter
 Grade 5 Every Day Counts Calendar Math by Gillespie and Kanter Kit
 Paper feet
 Highlighter tape
 Pocket chart
 Funnel
 Various size containers
 Grams and ounces weights
 Balance scale
 Clock
 3D shape models

Differentiation/Modification Strategies

Students with Disabilities	English Language Learners
<ul style="list-style-type: none"> • Consult student IEP • Allow errors • Rephrase questions, directions, and explanations • Allow a calculator when necessary • Allow extended time to answer questions, and permit drawing, as an explanation • Accept participation at any level, even one word • Consult with Case Managers and follow IEP 	<ul style="list-style-type: none"> • Consult student ELL Plan • Assign a buddy, same language or English speaking • Allow errors in speaking • Rephrase questions, directions, and explanations • Allow extended time to answer questions • Accept participation at any level, even one word
Gifted & Talented Students	Students at Risk
<ul style="list-style-type: none"> • Consult with G and T teacher • Provide extension activities • Make peer leaders • Build on students' intrinsic motivations • Consult with parents to accommodate students' interests in completing tasks at their level of engagement 	<ul style="list-style-type: none"> • Consult with I &RS as needed • Provide extended time to complete tasks • Consult with Guidance Counselors and follow I&RS procedures/action plans • Consult with classroom teacher(s) for specific behavior interventions • Provide rewards as necessary •
504 Students	Other:
<ul style="list-style-type: none"> • Consult 504 Plan • Allow errors • Rephrase questions, directions, and explanations • Allow a calculator when necessary
